OLEKSIY TESLYA

SOFTWARE ENGINEER | MSc STUDENT

Modena,Milan Italy | loshalavoro@gmail.com | +39 3519507996

Master's student in Computer Science and Engineering with a strong passion for application development and deep learning.Demonstrated through academic and personal projects a sharp attention to detail, a structured approach to problem-solving, and a genuine commitment to continuous growth in software engineering and Al.

EDUCATION

M.Sc Computer Science and Engineering at PoliMi **Sep 2025 - Present**

- Relevant coursework: Deep Learning, Distributed Systems, Design Implemetation of Mobile Application, Computer Security

B.Sc Computer Engineer at UniMoRe **Sep 2021 - Apr 2025**

- Thesis: “Implementation of a University Exam Scheduling System: Google Calendar Integration in Examore”
- Designed and developed a full integration between the Examore platform and Google Calendar API, implementing OAuth2 authentication and real-time data synchronization across systems.

EXPERIENCE

Software Developer Intern • Doxee - Modena, IT **Jun 2023 - Sep 2023**

- Contributed to full-stack development of software components, working both on frontend and backend
- Built and maintained Ul features using HTML, CSS, JavaScript and Vue.js framework
- Collaborated with the UI/UX team using Figma to design and prototype user interfaces
- Supported backend service development, debugging and codebase maintenance

PROJECTS

PolimiSpot • University Project

Full-stack Android/iOS & Web application helping students discover places, events and people around Polimi campuses.
I co-founded PoliMISpot, a campus discovery app for Politecnico di Milano students. I led the end-to-end development of a mobile application that helps students find quiet study areas, crowded spaces, and available spots in real time, based on crowd-sourced and sensor-based data. I worked on both the backend architecture and the mobile client, focusing on scalability, usability, and data quality, and coordinated a small team for prototyping, user feedback, and iterative releases.

AMXClub • Personal Project

AMX Club, a full e-commerce mobile app where users can browse, purchase, and manage orders. I implemented the backend with Supabase (database, authentication, and APIs) and developed the frontend in Flutter, focusing on a smooth shopping experience and clean, responsive Ul across devices.

ADDITIONAL INFORMATION

- **Languages:** Italian, English, Russian
- **Certification:** IELTS, MATLab
- **Programming:** C, C++, Python, Java, Dart, Kotlin.
- **ML frameworks:** PyTorch, Hydra, TensorFlow
