

OLEKSIY TESLYA

SOFTWARE ENGINEER JR.

Modena, Milan Italy | loshalavoro@gmail.com | +39 3519507996

Full-stack software engineer specializing in mobile development (Flutter, Android/iOS) and web applications (Vue.js, JavaScript). Experienced in real-time data synchronization, and scalable backend architecture with Supabase and Node.js. Co-founded PolimiSpot, a campus discovery app serving Politecnico di Milano students.

Currently pursuing M.Sc. in Computer Science with focus on Mobile Development and Distributed Systems.

EDUCATION

M.Sc Computer Science and Engineering at PoliMi

Sep 2025 - Present

- Relevant coursework: Deep Learning, Distributed Systems, Design Implementation of Mobile Application, Computer Security

B.Sc Computer Engineer at UniMoRe

Sep 2021 - Apr 2025

- Thesis: "Implementation of a University Exam Scheduling System: Google Calendar Integration in Examore"
- Designed and developed a full integration between the Examore platform and Google Calendar API, implementing OAuth2 authentication and real-time data synchronization across systems.

EXPERIENCE

Software Developer Intern · Doxee – Modena, IT

Jun 2023 – Sep 2023

- Contributed to full-stack development of software components, working both on frontend and backend
- Built and maintained UI features using HTML, CSS, JavaScript and Vue.js framework
- Collaborated with the UI/UX team using Figma to design and prototype user interfaces
- Supported backend service development, debugging and codebase maintenance

PROJECTS

PolimiSpot

Co-Founder & Lead Developer

- Co-founded campus discovery app for Politecnico di Milano students to find study spaces, events, and crowded areas in real time
- Led end-to-end development of Android/iOS mobile app and web platform, architecting backend with real-time data sync
- Implemented crowd-sourced and sensor-based data collection system, coordinating small team for prototyping and user feedback
- Built scalable backend architecture focusing on mobile client performance, usability, and data quality across platforms

AMXClub · E-Commerce App

- Built full e-commerce mobile app with Flutter frontend and Supabase backend (database, authentication, RESTful APIs)
- Implemented smooth shopping experience with product browsing, order management, and responsive UI across devices

SKILLS

- Languages: JavaScript, Dart, Python, SQL, HTML5, CSS3
- Frontend: Vue.js, Flutter, React, Android/iOS Development
- Backend: Node.js, RESTful APIs, OAuth2, Supabase, Real-time Data Sync
- Tools & Platforms: Git, Figma, Android Studio, Firebase

ADDITIONAL INFORMATION

- **Languages:** Italian, English, Russian
- **Certification:** IELTS, MATLAB
